

## Supporting Journals

This symposium will bring together scientists working on all aspects of mitochondria, from basic bioenergetics all the way to disease. Starting with the fundamental mechanisms of how mitochondria work, their architecture, dynamics, and quality control pathways, to their integrated role in metabolism, stress responses, intra- and intercellular communication, and culminating in the contribution of mitochondria to disease and inflammation, as well as strategies for targeting these organelles.

We hope the diversity of topics and scientists will lead to stimulating discussion around the open questions, what we need to do to answer them, and the future for this exciting field.

## Themes

- Mitochondrial biochemistry and bioenergetics
- Mitochondrial homeostasis, quality control and stress signalling
- Mitochondria in metabolism
- Mitochondrial communication
- Mitochondria in inflammation and disease
- Mitochondrial tools and targeting
