Peripheral neuroimmunology has emerged as one of the most transformative fields of biology, revealing new ways of thinking about neuro-immune interactions in inflammation, cancer, neurologic disease, and beyond. The goal of this meeting is to highlight new advances at the crossroads of neuroscience and immunology within tissue microenvironments across many organ systems. Peripheral neuroimmunology is redefining how we view basic biological systems and opening up entirely new therapeutic paradigms in medicine.

Keynote speakers

David Julius, USA
Susan Kaech, USA

Speakers

Isaac Chiu, USA
Ana Domingos, UK
Henrique Veiga Fernandes, Portugal
Ananda Goldrath, USA
Ruaidhri Jackson, USA
Jony Kipnis, USA
Vijay Kuchroo, USA
Qiufu Ma, China
Kara Marshall, USA
Ruslan Medzhitov, USA
Daniel Mucida, USA
Francesca Odoardi, Germany
Meenakshi Rao, USA
Asya Rolls, Israel
Xin Sun, USA

Peng Shi, China
Sebastien Talbot, Canada
Kevin Tracey, USA
Shannon Turley, USA

Organizers

David Artis, Weill Cornell Medicine,
Cornell University, New York, USA
Brian Kim, Icahn School of Medicine
at Mount Sinai, USA
Kavitha Scranton, Senior scientific
editor, *Immunity*
Bennie Babayan, Senior scientific
editor, *Neuron*
