

# Neuro-immune axis: Charting the periphery

In partnership with the Allen Discovery Center for Neuroimmune Interactions

September 7–9, 2025 — New York City, NY, USA

## Supporting Cell Press journals

Peripheral neuroimmunology has emerged as one of the most transformative fields of biology, revealing new ways of thinking about neuro-immune interactions in inflammation, cancer, neurologic disease, and beyond. The goal of this meeting is to highlight new advances at the crossroads of neuroscience and immunology within tissue microenvironments across many organ systems. Peripheral neuroimmunology is redefining how we view basic biological systems and opening up entirely new therapeutic paradigms in medicine.

## Session titles:

- Sensory neuroimmunology: Inflammation and host defense
- Peripheral tissue communication
- Interoception and immune homeostasis
- Allergens and microbes at the barrier
- Tissue and tumor microenvironments
